

Best Technology Talent For Companies Around The World

Dmytro

Manual QA Engineer

Summary

Detail-oriented QA Engineer with around 8 years of experience in manual testing of web-based SaaS applications, including long-term involvement in insurance domain projects. Strong expertise in functional, UI, regression, smoke, and sanity testing, along with solid experience in creating comprehensive test documentation (test cases, checklists, test plans) and detailed bug reporting using Jira.

Hands-on experience in API testing (Postman, Swagger), basic SQL for data validation, and browser DevTools for troubleshooting. Well-versed in Agile methodologies (Scrum, Kanban), actively participating in sprint planning and cross-functional team collaboration.

Strong analytical thinking, attention to detail, and a structured approach to quality assurance. A motivated and reliable team player with good communication skills and a continuous learning mindset, aiming to further develop in complex systems and modern QA practices.

TECHNICAL SKILLS:

- Testing Types: Manual testing, Functional testing, UI testing, Regression testing, Smoke testing, Sanity testing
- Testing Tools: Jira, Postman, Swagger, Chrome DevTools
- QA Practices: Test cases, Test plans, Checklists, Bug reporting
- Technical Skills: SQL / MySQL (basic), HTML, CSS (basic)
- Methodologies: Scrum, Kanban
