

# Best Technology Talent For Companies Around The World

## Oleh

### Senior Front-End Engineer & Product Designer

## Summary

Senior Front-End Engineer and Product Designer based in Berlin, with over 15 years of experience across web development, UI engineering, design systems, and product design. Has worked full-time and on contract across B2B SaaS, fintech, e-commerce, food delivery, tax technology, and ground transportation domains.

Core stack includes Vue.js, Nuxt, React, TypeScript and Next.js. Covers the full spectrum from UX/UI design in Figma and Sketch to production frontend implementation - including email template generators, onboarding flows, marketing pages, admin interfaces, and white-label applications. Has applied AI prototyping and vibe-coding tools to bridge design and engineering handoff.

Though his experience, has delivered CRM tools, desktop applications, marketing websites, and infrastructure support for small businesses and agencies, etc. Earlier freelance work included projects for Intel, Microsoft, and Grammarly.

#### TECHNICAL SKILLS:

- **Front-end:** React, TypeScript, Next.js, Vue, Nuxt, HTML, CSS, JavaScript, SCSS
- **Design Systems:** Storybook, component libraries, design tokens, CSS modules
- **Back-end & CMS:** Ruby on Rails, WordPress, Hugo, jQuery
- **UI/UX & Design:** Figma, PenPot, Sketch, InVision, Adobe CS, Affinity, AI prototyping
- **Testing:** Jest
- **DevOps & Infra:** GitHub, GitLab, Bitbucket, infrastructure support
- **Other:** Email template generators, photo & video editing.

# Work Experience

## Design Engineer (Front-End Engineering, Product Design)

November 2023 – Present | Berlin, Germany

### Project info:

Independent contracting practice delivering product design, UX/UI design, and front-end engineering services. Clients include small retail businesses, consulting agencies, and product startups. Scope covers internal CRM applications, marketing websites, design systems, desktop applications, and infrastructure support.

### Responsibilities:

- Created internal CRM applications for small retail businesses.
- Designed and implemented design systems and component libraries from scratch.
- Built and maintained marketing websites for a consulting agency.
- Provided infrastructure support and DevOps services.
- Designed and developed desktop applications.

### Software and technologies:

React, Vue.js, TypeScript, Figma, HTML, CSS, JavaScript.

## UX/UI Designer

April 2025 – August 2025 | Berlin, Germany

### Project info:

A B2B ground transportation management platform operating across Europe. The role focused on the design of flows and screens for an internal dashboard application used by transport operators and partners.

### Responsibilities:

- Designed user flows and screens for a B2B dashboard application for ground transportation management.
- Maintained and extended the existing product design system.
- Collaborated with Product Owners to convert ideas into development-ready design flows using AI prototyping and vibe-coding tools.

### Software and technologies:

Figma, AI prototyping tools, design systems.

## Senior Front-End Engineer

September 2021 – September 2023 | Berlin, Germany

### Project info:

A German tax filing SaaS platform offering a client-facing web application and marketing website. The role combined front-end engineering with design system ownership, covering both internal tooling and public-facing product surfaces.

### Responsibilities:

- Implemented and supported internal tools and the client-facing Ruby on Rails application and Hugo websites.
- Took ownership of design unification and led the creation of the company design system.
- Built a React.js component library with TypeScript, CSS modules, Storybook, and Jest.
- Implemented a WordPress theme for the new wundertax.de website and affiliated brands.
- Redesigned key marketing pages using the new design system.
- Designed and implemented the onboarding flow.

### Software and technologies:

React.js, TypeScript, CSS modules, Storybook, Jest, Ruby on Rails, Hugo, WordPress.

## Software Engineer (Design System)

April 2021 – August 2021 | Berlin, Germany

### Project info:

A global online food delivery marketplace. As part of the Design System team, the role focused on implementing and maintaining the design system for company products, supporting multiple engineering teams.

### Responsibilities:

- Implemented, maintained, and documented the design system and related products.
- Developed a UI component library using Next.js, Storybook, SCSS modules, and Jest.
- Provided technical support to multiple engineering teams consuming the design system.

### Software and technologies:

Next.js, Storybook, SCSS modules, Jest, TypeScript.

## UI Engineer, Consultant (Part-time)

January 2020 – December 2020 | Berlin, Germany

### Project info:

An online education platform. The role combined frontend development with design consulting and mentoring contributions to a published book and online course on software development.

### Responsibilities:

- Developed the front-end of the education platform using Nuxt.js, Vue.js, and Vuetify.
- Consulted on the design chapter for the book "Software Development From A to Z".
- Mentored and contributed to the product design chapter of an online software development course.

### Software and technologies:

Nuxt.js, Vue.js, Vuetify.

## UI Engineer

November 2017 – March 2021 | Berlin, Germany

### Project info:

A Berlin-based fintech company offering white-label payment and reward solutions. The role bridged design and engineering, covering both the product UI and the company-facing website.

### Responsibilities:

- Collaborated with Creative and Engineering teams to prototype, design, and implement accessible UI for a white-label web application and landing pages.
- Worked across design tools (Sketch, InVision, Figma) and frontend frameworks (React.js, Vue.js, WordPress).
- Maintained and updated the company website.
- Designed information-heavy presentations for internal and external use.
- Built an email templates generator.
- Collaborated on the creation of the company design system.

### Software and technologies:

React.js, Vue.js, WordPress, Storybook, Sketch, InVision, Figma.

## UI Developer

August 2016 – October 2017 | Berlin, Germany

### Project info:

A Berlin-based e-commerce platform for art and design products. The role focused on front-end implementation, A/B testing, tooling, and cross-functional support for design and marketing teams.

### Responsibilities:

- Implemented and iterated on layout development using HTML, SCSS, JavaScript, and Bootstrap.
- Performed A/B testing and ongoing UI updates.
- Developed a Gulp-based multilanguage email templates generator.
- Took ownership of design and collaborated on a React-based admin interface with a visual landing page builder.
- Supported marketing and design departments with prototypes and platform improvements.

### Software and technologies:

HTML, SCSS, JavaScript, Bootstrap, React.js, Gulp.

## Web Developer & Designer

January 2009 – July 2016 | Ukraine

### Project info:

Contract and agency-based web development and design work across multiple companies in Ukraine (Perfectionist, Nich, Cheesebanana, Unteleported, FreshTech, EdEra). Freelance clients included Intel, Microsoft, Grammarly, and others.

### Responsibilities:

- Delivered frontend development and web design across client and internal projects.
- Worked with international clients including Intel, Microsoft, and Grammarly as a contractor.

### Software and technologies:

HTML, CSS, JavaScript, various CMS and design tools.

# Education

**2009 – 2015**

**Taras Shevchenko National University of Kyiv**

Institute of High Technologies

Master of Science – Physics, Chemistry, Biology.

# Foreign Language Skills

**Ukrainian:** Native

**English:** Fluent

**German:** Intermediate.
