

# Best Technology Talent For Companies Around The World

## Sviatoslav

QA Engineer

### Summary

Senior QA Engineer with 6+ years of experience in manual and automation testing for web and mobile applications. Strong expertise building QA processes from scratch for complex products. Experienced in API testing, performance testing, and validation of complex financial systems, including payment workflows and multi-currency transactions.

Hands-on experience with AWS environments, SQL validation, and cross-functional collaboration with developers, product teams, and engineering leadership. Comfortable working in international teams and fully English-speaking environments.

#### TECHNICAL SKILLS:

- Automation: Python, Selenium WebDriver.
- Testing Types: Functional, Regression, API, Performance (JMeter), Security, Localization, Mobile (Android/iOS).
- Tools: Postman, Charles Proxy, JMeter, Jira, Confluence, TestRail, Chrome Dev Tools.
- Technical: SQL, Linux (Ubuntu/Command Line), AWS, ADB, Xcode, Git.

# Professional Career

## QA Engineer

November 2021 – October 2025 | Ukraine

### Project info:

FinTech platform supporting online payment processing, refund workflows, and localization across multiple currencies and markets.

### Responsibilities:

- Team Leadership: Coordinated QA processes for 8 engineers across Front-end, Core, and Back-office teams to ensure seamless product releases.
- Automation Development: Created and maintained Python/Selenium test suites for efficient regression testing.
- Process Creation: Designed a full-cycle test suite for Back-office project components starting from the initial development phase.
- FinTech Testing: Validated complex payment methods, including partial and full refunds and localization for various currencies.
- Performance & API: Executed performance testing via JMeter and security-focused API testing via Postman/Python.
- Technical Environment: Managed testing activities on AWS environments and used SQL for database validation.

### Software and technologies:

Python, Selenium, Postman, JMeter, AWS, SQL, Linux, Jira, TestRail

## QA Engineer

November 2019 – October 2021 | Ukraine

### Project info:

Online gaming platform focused on developing and launching digital casino games with strict compliance and performance requirements.

### Responsibilities:

- Embedded QA: Worked closely with developers, mathematicians, and artists from the prototype stage to ensure product readiness.
- Game Testing: Developed game-specific test cases covering mechanics, features, and compliance scenarios.
- Traffic Analysis: Used Charles Proxy and JSON for API traffic monitoring and debugging.
- Communication: Operated in a 100% English-speaking environment with 75% native speakers.

### Software and technologies:

Charles Proxy, JSON, Jira, Web testing tools

## QA Engineer

May 2019 – October 2019 | Ukraine

### Project info:

Web and mobile applications developed for digital products and marketing platforms.

### Responsibilities:

- Executed manual testing for web applications and mobile apps.
- Created detailed bug reports, test plans, and usability reports.
- Utilized Jira and Avocode for daily quality control tasks.

## Education

2007 – 2012

Lviv Polytechnic National University

Master's Degree in Laser and Opto-electronic Technology

## Foreign Languages Skills

**English:** Upper-Intermediate

**Ukrainian:** Native
