

Best Technology Talent For Companies Around The World

Alice

Full Stack Developer (Ruby / React)

Summary

Full Stack Developer with 5+ years of experience building and maintaining web applications using Ruby on Rails on the backend and React / Vue.js on the frontend. Experienced across the full development lifecycle, from greenfield projects to legacy system migrations and performance improvements. Has worked on platforms in education tech, AI-powered tooling, and public sector domains. Comfortable with GraphQL, REST APIs, automated testing, and CI/CD workflows. Fluent in English.

TECHNICAL SKILLS:

- **Backend:** Ruby on Rails (RSpec, Sidekiq, ActiveRecord)
- **Frontend:** React, Vue.js, Node.js, JavaScript, TypeScript, Jest, Cypress, Prisma
- **Databases:** PostgreSQL, Firebird
- **API:** REST, GraphQL
- **AI Integration:** LLM APIs (Gemini, OpenAI)
- **Testing:** Unit, Integration, End-to-End (RSpec, Jest, Cypress)
- **DevOps & Tools:** CI/CD, Git, Docker

Professional Career

Full Stack Developer

September 2022 – Present | Brazil, Remote

Project description:

Multi-client remote development team delivering full-stack features across several client-facing platforms. Projects include a web-based AI-powered video editing system and an AI task automation platform. Domain: SaaS / EdTech / AI Tooling.

Responsibilities:

- Developed a web-based AI-powered video editing system using ReactJS, Python, and Google Gemini
- Developed a web chemistry project for chemical hazard analysis using Ruby on Rails and Vue.js
- Developed an AI task automation platform, implementing user authentication/management and a PRD generation pipeline that converts decomposed tasks into structured specifications for AI-assisted coding
- Improved stability and performance of multiple platforms by upgrading Ruby on Rails codebases and removing technical debt
- Contributed to full-stack feature development across multiple client-facing platforms
- Participated in code reviews and agile ceremonies as part of a remote development team
- Collaborated with designers and product managers to ensure seamless integration of features

Software and technologies:

Ruby on Rails, Vue.js, ReactJS, Python, Google Gemini, LLM APIs, CI/CD, Git

Full Stack Developer

October 2020 – August 2022 | Brazil

Project description:

Internal business management systems and client-facing platforms built on Ruby on Rails and ReactJS. Covered full-stack development from feature implementation to database management and API architecture. Domain: Business Software / SaaS.

Responsibilities:

- Developed and maintained systems using ReactJS on the frontend and Ruby on Rails on the backend
- Managed PostgreSQL database operations and queries for efficient data handling
- Contributed to the migration from RESTful APIs to GraphQL for improved efficiency and flexibility
- Identified and resolved bugs, implemented new features, and enhanced system performance

Software and technologies:

Ruby on Rails, ReactJS, PostgreSQL, GraphQL, REST API, Git

Helpdesk / Technical Support

April 2019 – October 2020 | Brazil

Project description:

Technical support role covering software configuration, user training, and issue resolution for business clients. Domain: IT Support / Business Software.

Responsibilities:

- Provided technical support and training to users on software use and configuration
- Diagnosed and resolved client-reported issues, ensuring system functionality and client satisfaction
- Utilized Firebird database for data management and debugging

Software and technologies:

Firebird, Windows, Support Tools

Education

2025 – 2027

UNIVALI — University of Vale do Itajaí, Brazil
Master's Degree in Computer Applications

2019 – 2024

UNIVALI — University of Vale do Itajaí, Brazil
Bachelor's Degree in Computer Science

2017 – 2018

SENAI/SC — National Industrial Learning Service, Brazil
Technical Course in Electromechanics

Foreign Languages Skills

English: Advanced

Portuguese: Native
