

Best Technology Talent For Companies Around The World

Ciprian

Senior Software Engineer

Summary

Senior Software Engineer and Team Lead with 10+ years of experience in designing and delivering scalable software solutions across various domains. Strong expertise in microservices architecture, cloud-native development, and distributed systems. Proven track record of leading cross-functional teams, driving architectural decisions, and delivering end-to-end product development in Agile environments. Experienced in backend development with Go, PHP, and C#, as well as building CI/CD pipelines and cloud infrastructure on AWS. Skilled in mentoring engineers, improving development processes, and ensuring high-quality software delivery. Demonstrates strong ownership, problem-solving skills, and ability to bridge technical and business requirements.

TECHNICAL SKILLS:

- Programming Languages: Go, PHP, C#, Java, JavaScript
- Backend & Frameworks: Node.js, Microservices Architecture, REST APIs
- Databases & Storage: MySQL, MongoDB, Redis, Elasticsearch
- Cloud & DevOps: AWS (ECS, ECR, CloudWatch, Fargate), Docker, CI/CD (Jenkins), Groovy
- Architecture & Concepts: Microservices, Service-Oriented Architecture (SOA), Domain-Driven Design (DDD), Event-Driven Architecture (RabbitMQ)
- Methodologies & Leadership: Agile (Scrum, Kanban), Team Leadership, Mentorship, Backlog Management, Code Review

Professional Career

Software Engineer / Team Lead

December 2021 – Present | Bucharest, Romania

Project Info:

E-commerce platform and internal systems modernization with focus on migrating legacy services to cloud-native microservices architecture using Golang and AWS

Responsibilities:

- Led migration of legacy systems to modern microservices architecture using Go and cloud technologies
- Designed and implemented CI/CD platform using Java and Groovy to standardize deployment processes
- Built and optimized cloud infrastructure using Docker and AWS services including ECS and Fargate
- Led end-to-end product development lifecycle from architecture design to deployment
- Designed API contracts and service interaction patterns for scalable distributed systems
- Managed integrations with third-party partners and external systems
- Acted as Product Owner for critical business flows within the platform
- Led Agile ceremonies including stand-ups, sprint planning, and retrospectives
- Mentored team members and improved engineering practices across the team
- Contributed hands-on to development using Go, PHP, and C#

Software and technologies:

Go, PHP, C#, Java, Groovy, AWS (ECS, ECR, CloudWatch, Fargate), Docker, Jenkins, Microservices, REST APIs

Software Engineer

February 2017 – December 2021 | Bucharest, Romania

Project Info:

Development and maintenance of backend services for e-commerce platform, focusing on performance, scalability, and large-scale data processing

Responsibilities:

- Developed and maintained backend services using PHP and Go
- Designed and implemented new system features and improvements
- Acted as application owner for several services
- Worked with large-scale databases and optimized complex queries

- Participated in system design and architecture discussions
- Ensured system stability and performance improvements

Software and technologies:

PHP, Go, MySQL, Microservices

Software Engineer

July 2016 – February 2017 | Bucharest, Romania

Project Info:

ERP system for e-commerce operations, supporting product management, logistics, and internal business processes

Responsibilities:

- Developed new features for ERP system
- Improved existing workflows and system performance
- Maintained and supported production systems
- Implemented product aggregation and variation features

Software and technologies:

PHP, MySQL

Full Stack Web Developer

June 2015 – June 2016 | Bucharest, Romania

Project Info:

Development of web applications for various business domains, focusing on full-stack delivery and client-specific solutions

Responsibilities:

- Developed full-stack web applications for different clients
- Implemented backend and frontend functionality
- Collaborated with teams to deliver project requirements
- Maintained and improved existing systems

Software and technologies:

PHP, JavaScript, MySQL

Web Developer

March 2012 – November 2012 | Bucharest, Romania

Project Info:

Development of web-based solutions for various small business needs

Responsibilities:

- Developed web applications and websites
- Implemented frontend and backend features
- Maintained and updated existing solutions

Software and technologies:

PHP, JavaScript, HTML, CSS

Education

Universitatea "Valahia" Targoviste

Bachelor of Science in Mathematics and Informatics

Foreign Languages Skills

English: Upper-Intermediate

Romanian: Native
