

Best Technology Talent For Companies Around The World

Mykhailo

Senior Software Developer

Summary

Software Developer with a solid experience in building web applications. Proficient in front-end development using ReactJS, TypeScript, CSS, and HTML, with a solid foundation in backend technologies like Node.js, MongoDB, and SQL. Bring along valuable experience of working effectively in distributed teams across the globe. Able to quickly adapt to new environments and deliver quality work in a timely manner. Looking for a role within front-end development, where I can work on building detail-filled interfaces, and creating complex components rich in logic and graphical effects

TECHNICAL SKILLS:

- JavaScript and Related Libraries/Frameworks:
- JavaScript, TypeScript, React.js, Node.js, Next.js, Express, Sails, React Native, Vue
- HTML, CSS and CSS Preprocessors: HTML5, Semantic HTML, CSS3, SASS, LESS, CSS modules
- User Interface (UI) Libraries / Frameworks: Material-UI, Semantic UI, Bootstrap, Styled Components, Tailwind, CSS
- Frontend Build Tools: Babel, Webpack,
- Testing Libraries/Frameworks:
- Unit tests: Jest, React testing library, Enzyme Cypress, Mocha, Jasmine.
- e2e tests: Playwright
- Database Technologies: MongoDB, PostgreSQL
- API Design Skills: REST, GraphQL
- AWS API Gateway, Lambda, Cognito, S3

Professional Career

Senior Software Developer

September 2024 – Present | Lviv, Ukraine

Project info:

MarTech project. An integrated platform combining AI-powered creative analytics with a production workflow system connected to a global network of expert creators. This platform dramatically improves ad campaign ROI through actionable creative insights, faster creative turnaround, better performing ads and streamlined workflow.

Responsibilities:

- Standardized data-fetching layer: Unified React Query patterns (query keys, cache/stale times, retries, prefetching) to de-duplicate requests and make loading/error states consistent across the app
- Refactored a core feature: Improved extensibility, maintainability, and readability, simplifying and de-risking future enhancements
- Improved feature design: Proposed a clearer UI approach and aligned patterns across components for a more consistent codebase
- Strengthened testing & release quality: Added focused Jest/RTL tests for critical paths and documented conventions
- Built and maintained a Next.js/Node.js BFF: Implemented and documented route handlers/endpoints, added input validation and shared TypeScript types with the frontend, and kept API contracts stable for client teams
- Prisma data layer & API testing: Modeled schemas and migrations with Prisma, wrote performant query/repository logic, and created integration tests for APIs (Jest + Supertest) to catch regressions early

Software and technologies:

React, Next.js, TypeScript, React Query, Material UI, Node.js, Next.js Route Handlers/API routes, Prisma ORM, Jest, Testing Library, AWS

Senior Frontend Engineer

October 2023 – September 2024 | Lviv, Ukraine

Project info:

Real Estate Application

Responsibilities:

- Collaborated with cross-functional teams to design and develop new features, ensuring high-quality user experiences

- Implemented responsive and adaptive UI components to enhance the performance and usability of web applications
- Developed and maintained comprehensive E2E and unit test suites to ensure code quality and reliability
- Engaged in requirement-gathering sessions with stakeholders to understand project needs and translate them into technical specifications
- Collaborated with product managers and designers to refine and prioritize features based on user feedback and business goals
- Ensured consistent code quality by following best practices and conducting regular code reviews
- Created and updated documentation for developed features, facilitating easier onboarding and knowledge transfer

Software and technologies:

ReactJS, Next, TypeScript, GraphQL, Jest, testing-library, Playwright

Front End Developer

September 2019 – September 2023 | Khmelnitsky, Ukraine

Project info:

E-Commerce Project: Online Auctions

Responsibilities:

- Developed a rich User Interface (UI) for the project, providing an intuitive and aesthetically pleasing user experience for clients
- Tasked with integrating services from various projects, creating a harmonious and efficient system to meet the project objectives
- Developed and maintained a reusable components library, promoting optimal reusability and efficiency in future development cycles

Software and technologies:

ReactJS, TypeScript, NodeJS, Next.js Jest, testing-library

Full Stack Developer

November 2017 – August 2019 | Khmelnitsky, Ukraine

Project info:

Cyber Security Platform

Responsibilities:

- Integrated user-facing elements with server-side logic, reinforcing a strong comprehension of front-end technologies
- Created and managed backend APIs, ensuring proper functioning and efficient data storage

- Added integration tests and created a tool to automate parsing templates, increasing development speed and improving the developer experience

Software and technologies:

ReactJS, TypeScript, NodeJS, Sails, Jenkins, PostgreSQL, AWS

Frontend Developer

September 2016 – October 2017 | Khmel'nitsky, Ukraine

Project info:

Car Sales Platform

Responsibilities:

- Successfully developed and maintained the front-end functionality of the mobile application using React Native
- Integrated various services using RESTful APIs and managed state using the Context API and Redux
- Optimized application performance, reducing load times and streamlining code for increased efficiency
- Provided comprehensive test coverage to ensure the stability of applications

Software and technologies:

React Native, Firebase, React, Redux

Full Stack Developer

August 2015 – August 2016 | Khmel'nitsky, Ukraine

Responsibilities:

- Worked on various projects, developing robust, scalable, and high-performing web applications using both front-end and back-end technologies
- Collaborated with designers, product managers, and other developers to understand project requirements and translate them into technical specifications
- Created and managed end-to-end (E2E) and unit test suites to ensure code reliability and functionality

Software and technologies:

React, Angular, Nodejs, Express, MongoDB, Firebase.

Education

2014 – 2018

Khmel'nitsky National University

Bachelor's Degree in Computer Engineering

Foreign Languages Skills

English: Upper-Intermediate

Ukrainian: Native
