

Best Technology Talent For Companies Around The World

Evgeniy

Senior/Lead Java Engineer

Summary

Senior/Lead Java Backend Engineer with 10+ years of experience designing and developing enterprise-scale distributed systems and cloud-native applications. Strong expertise in Java, Spring Boot, Kafka, Kubernetes, Azure, AWS, PostgreSQL, and microservices architecture. Experienced in system design, event-driven architecture, API development, production ownership, performance optimization, and modernization of complex backend systems. Strong hands-on experience building and operating cloud-native microservices, designing REST APIs and Kafka integrations, optimizing SQL and application performance, and working with high-volume data platforms. Has contributed to Java and Spring Boot modernization, monolith-to-microservices transformation, and production systems running on Kubernetes/AKS. Experienced across e-commerce, FinTech, online banking, Forex trading, and airline booking/ticketing systems, with exposure to complex enterprise and integration environments. Combines strong hands-on backend engineering with technical leadership, including architecture discussions, mentoring, code reviews, onboarding, and technical interviews.

TECHNICAL SKILLS:

- Backend: Java 17/21, Spring Boot 3/4, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs, GraphQL, OpenAPI
- Databases: PostgreSQL, Oracle, MySQL, MS SQL Server, MongoDB, Redis, JSONB, Flyway
- Cloud & DevOps: Azure, AWS, AKS, Azure Storage, Azure Secrets, AWS S3, AWS RDS, Docker, Kubernetes, Jenkins, CI/CD
- Testing / QA: JUnit5, Mockito, Testcontainers, Awaitility, WireMock, SonarQube, Snyk, Jacoco

- Architecture: Microservices, Distributed Systems, Event-Driven Architecture, Cloud-Native Applications, API Design, Saga Pattern, Transactional Outbox
- Other: Apache Kafka, Kafka Connect, RabbitMQ, IBM MQ, Splunk, New Relic, GitHub Copilot, Tabnine, Python, FastAPI, LangChain (learning)

Professional Career

Senior / Lead Java Engineer

July 2021 – Present | Ukraine

Project info:

Enterprise-scale taxonomy and regulation platforms built as cloud-native Java microservices, managing 2M+ products and 4.8M+ product mappings within a distributed engineering team of 11 members across the UK, India, and Ukraine

Responsibilities:

- Owned architecture and development of 7 cloud-native Java microservices
- Designed REST APIs and Kafka/Kafka Connect integrations consumed by internal engineering teams
- Improved performance through SQL optimization, JSONB improvements, Kafka tuning, JVM analysis, Redis and Caffeine caching
- Participated in Java 11 to 17 to 21 and Spring Boot 3 to 4 modernization
- Owned production systems on AKS including monitoring, incident investigation, and fixes
- Mentored engineers and performed code reviews, onboarding, and technical interviews

Software and technologies:

Java, Spring Boot, Kafka, Kafka Connect, Kubernetes, AKS, Azure, PostgreSQL, JSONB, Redis, Caffeine

Senior Full Stack Engineer (Java + React)

November 2016 – July 2021 | Ukraine

Project info:

FinTech applications supporting online banking, Forex trading, and risk and control departments

Responsibilities:

- Developed Java Spring backend services and React applications supporting financial operations
- Participated in the evolution towards microservices and self-contained systems
- Worked with REST APIs, GraphQL, RabbitMQ, Redis, Docker, and CI/CD pipelines
- Participated in architecture discussions, code reviews, and Agile delivery

Software and technologies:

Java, Spring, React, REST APIs, GraphQL, RabbitMQ, Redis, Docker, CI/CD

Senior Java Engineer

November 2015 – November 2016 | Ukraine

Project info:

Airline systems supporting booking, passenger registration, and ticketing processes

Responsibilities:

- Developed airline booking, passenger registration, and ticketing systems
- Participated in monolith decomposition into Spring Boot microservices
- Worked with Spring Cloud, Hibernate, REST APIs, SQL, and MongoDB

Software and technologies:

Java, Spring Boot, Spring Cloud, Hibernate, REST APIs, SQL, MongoDB

Java & Integration Engineer

2011 – 2015 | Ukraine

Project info:

Enterprise Java development and middleware integration work using messaging, SOAP/XML services, and Oracle-based systems

Responsibilities:

- Worked on enterprise Java development and middleware integrations

Software and technologies:

Java, Spring, IBM MQ, WebSphere Message Broker, SOAP, XML, Oracle

Education

National Aviation University

Master's degree in Information Security

Languages

English: Upper-Intermediate

Ukrainian: Native
