

Best Technology Talent For Companies Around The World

Gabi

Frontend Engineer

Summary

Frontend Engineer with 10+ years of experience delivering high-quality web in Angular 2+ TypeScript frontend development, PHP/Node.js backend, MySQL databases, and technical SEO. Brings a rare combination of enterprise frontend engineering and deep SEO expertise: page rank and domain authority building, link building strategy, page speed optimisation, and AI (ChatGPT API) integration for SEO content. Developed and implemented innovative solutions across various project types, including web CMS systems, payment gateways, automotive/infotainment projects, and banking projects.

Experienced with payment gateway integrations (PayPal, Stripe, RomCard, Bancpost, BT iPay), courier APIs (Cargus, FanCourier), domain registration systems, and social media APIs. Has supervised development teams and collaborated directly with Microsoft on an automotive internal project. A creative thinker with a passion for innovation, capable of thriving in collaborative team environments.

TECHNICAL SKILLS:

- Frontend: Angular 2+, TypeScript, JavaScript, HTML5, CSS3, jQuery, Vue.js, RxJS
- Backend: Node.js, PHP, MySQL, REST APIs
- Integrations: PayPal, Stripe, RomCard, Bancpost, BT iPay (payment gateways); Cargus, FanCourier (courier APIs); SMTP newsletters; domain registration APIs; social media APIs; ChatGPT API; Facebook Marketing
